

# Real-time, non-reversible voice anonymization

# Technical data

- Based on Voice Imitation Technology
- Non-reversible (voice transformation is not irreversible!)
- Hybrid use of AI & digital voice processing
- Allows faithful reproduction and/or anonymization of human voice
- Works in real-time
- Anonymized voice is unrecognizable & very realistic
- Requires low computing power
- Adaptable to all languages
- Now available in French, German, Italian & English (to be improved)
- Can be integrated into any system and small processors (e.g. ARM)

# CandyVoice DNA

- Expertise in Digital Voice Processing
- +20 years of R&D
- Muvoc® technology patented in EU & USA
- Proven & resource-efficient technology
- Technological modules:
  - Voice Imitation
  - Voice Imitation Detection
  - Voice Transformation
  - Noise Filter
